

## Policy of Total Accessibility

Ayuntamiento  
de Málaga

Palacio de Ferias  
y Congresos  
de Málaga  
Trade Fairs and Congress Center of Málaga

Our commitment with the society requires us to place universal accessibility among our priorities, so that everyone may enjoy the services we offer.

The basic objective is the equipping of rooms and areas with human and technical resources that meet the requirements of the sponsors in the organization of the events, and that make possible the attraction of everyone, including those who have any type of disability, within an accessible setting.

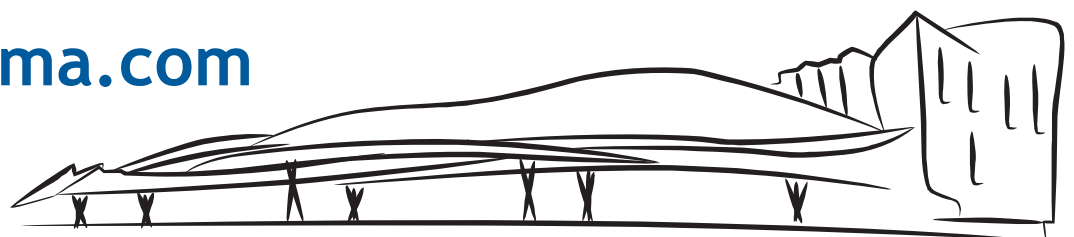

This commitment is instrumented in the implementation of a System of Accessibility Management that is adapted to the indications of the **UNE 170001** standard.

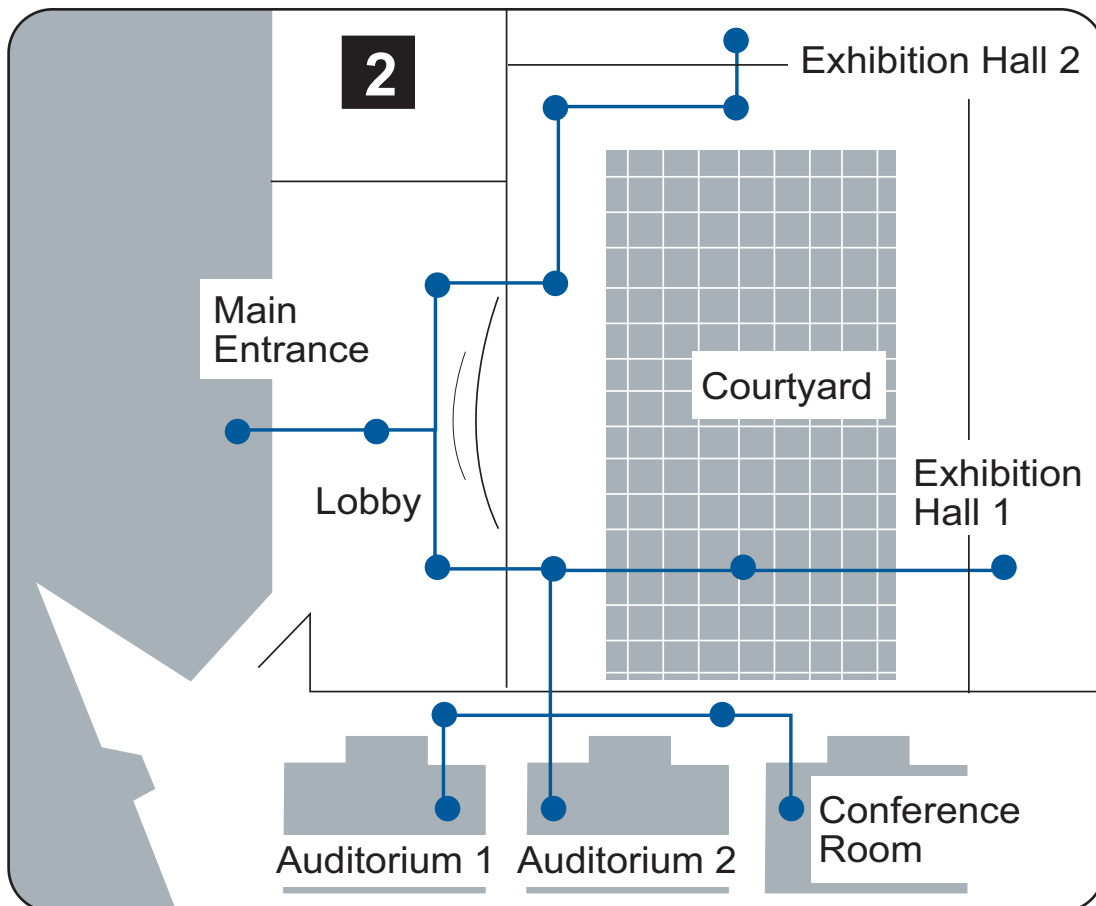

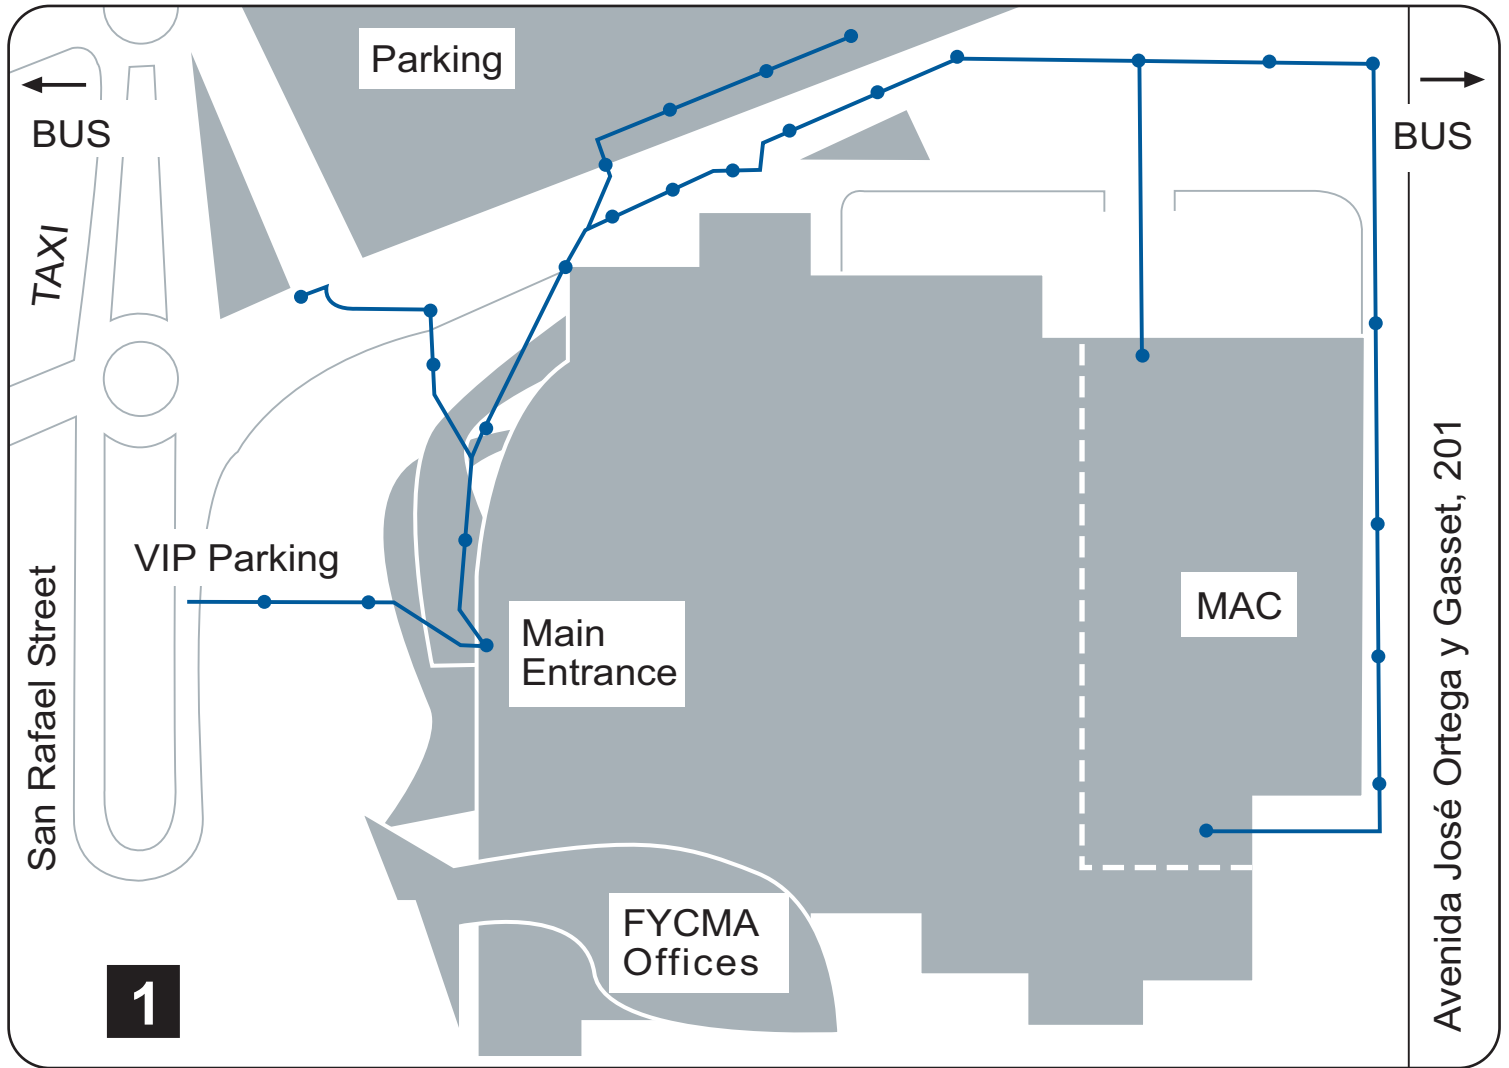

To achieve these objectives, the FYCMA Management proposes:

- To comply with the applicable legislation with respect to accessibility coming from all the legislative areas.
- For everyone from FYCMA to collaborate in attaining the objectives of the Management System in the specific areas that are assigned to them.
- For the Management System to be a dynamic instrument in a constant state of progress, as regards both its structures (documentation, organization, etc.) and in the specific objectives that are proposed each year.
- For the clients and users to be our reference point of the continuous improvement and of our services in order to make them increasingly accessible to everyone.
